

MASHKOOR PATEL

Technical Support Engineer — Azure Cloud & Infrastructure

Bhusawal – 425201, Maharashtra | Open to Relocation | +91 7378517681 | patelmashkoor8@gmail.com | [linkedin.com/in/mashkoorpatel](https://www.linkedin.com/in/mashkoorpatel)

PROFESSIONAL SUMMARY

Customer-focused Technical Support Engineer with 1+ year of hands-on experience resolving complex technical issues across Azure cloud infrastructure, API integrations, and data pipeline environments. Proven ability to own end-to-end troubleshooting of production-impacting incidents — from diagnosing Azure Synapse authentication failures and OAuth 2.0 connectivity errors to performing deep-dive log analysis and SQL query investigations. Strong foundation in TCP/IP, DNS, HTTP/S, and REST API protocols with practical experience managing Azure Data Lake (ADLS Gen2), Azure Synapse Analytics, and AWS cloud services. Experienced in Agile environments using Jira, writing internal troubleshooting documentation, and collaborating cross-functionally to escalate and resolve defects. Committed to continuous learning and delivering customer success aligned with Microsoft's CSS mission.

PROFESSIONAL EXPERIENCE

Junior Software Engineer – Cloud & Data Support | Pingahla

Remote – Pune, India | Jun 2025 – Present

- **Response & Resolution:** Own and investigate complex production-impacting technical issues including Azure Synapse API authentication failures, OAuth 2.0 connection errors, and ETL pipeline ingestion failures — performing deep-dive log analysis, PostgreSQL query investigation, and structured root-cause analysis to achieve full resolution.
- **Troubleshooting & Diagnostics:** Diagnose and resolve cloud infrastructure issues across Azure Data Lake (ADLS Gen2), Azure Synapse Analytics, and AWS S3 — monitoring service health, identifying schema misalignments, NULL-mapping failures, and data inconsistencies to restore pipeline reliability and data availability for enterprise workflows.
- **API & Connectivity Support:** Troubleshoot and resolve REST API integration failures across multi-source connectors including Snapchat Ads, LinkedIn Ads, and Navan — diagnosing HTTP/S errors, OAuth token expiry issues, and endpoint connectivity failures to maintain uninterrupted data ingestion workflows.
- **Readiness & Documentation:** Author internal technical troubleshooting guides, runbooks, and pipeline configuration documentation to share knowledge, reduce resolution time, and enable team-wide incident response readiness.
- **Product & Process Improvement:** Identify recurring infrastructure defects, performance bottlenecks, and connector failures — escalating root causes with detailed logs and reproduction steps to cross-functional engineering teams to drive long-term product stability improvements.
- **Collaboration:** Work in an Agile/Scrum environment via Jira; provide proactive status updates to team leads and stakeholders on incident progress, pipeline health, and resolution timelines.

Data Analyst Intern | TechMaster

Onsite – Bhusawal, India | Jun 2024 – Dec 2024

- **Troubleshooting & Resolution:** Resolved data integrity and reporting discrepancies by writing complex SQL queries — including joins, aggregations, and subqueries — to investigate root causes across internal corporate relational databases and communicate findings to stakeholders.
- **Monitoring & Reporting:** Built and supported interactive Power BI dashboards tracking critical business KPIs; generated automated data quality alerts and recurring operational reports to maintain service-quality standards and support compliance requirements.

TECHNICAL SKILLS

Cloud & Azure Infrastructure: Azure Data Lake (ADLS Gen2), Azure Synapse Analytics, Azure Storage, AWS (S3, EC2), Google Cloud Platform (Foundational)

Networking & Protocols: TCP/IP, HTTP/S, DNS, DHCP, FTP/SFTP, SSL/TLS, REST APIs, OAuth 2.0, VPN (Conceptual), OSI Model Understanding

Troubleshooting & Diagnostics: Log Analysis, Root Cause Analysis, API Testing (Postman), Pipeline Monitoring, Data Validation, Schema Debugging, Incident Management

Operating Systems & Scripting: Windows 10/11, Linux (CLI), PowerShell, Unix/Linux Shell, Python (Automation & Scripting)

Virtualization & Infrastructure: VMware, VirtualBox (Home Lab — Multi-OS Deployments), DNS Record Management (A, CNAME, MX), SSL Certificate Installation, Server Provisioning (cPanel, Hostinger)

Databases & Query: SQL (Advanced Queries, Joins, Data Profiling), PostgreSQL, Snowflake

Automation & Low-Code: Automation Anywhere A360 (RPA Pipeline Development), Power Automate (Foundational)

Tools & Collaboration: Jira (Agile/Scrum), Git, Postman, Django (REST API), Technical Documentation

Analytics & BI: Power BI (Dashboard Design, KPI Reporting), Tableau

PROJECTS & FREELANCE EXPERIENCE

Multi-Source API Connector Troubleshooting & ETL Support | Pingahla

Jun 2025 – Present

- Developed and troubleshot end-to-end ETL pipeline connectors for Snapchat Ads, LinkedIn Ads, and Navan — diagnosing OAuth 2.0 authentication failures, token refresh errors, and HTTP endpoint issues across Azure Data Lake, AWS S3, and relational database integrations.
- Stress-tested connectors against large-scale datasets to validate schema consistency, data type compatibility, and ingestion reliability — identifying and resolving failures before they impacted downstream analytics consumption.
- Supported team onboarding by guiding colleagues through environment configuration, codebase setup, and error debugging — authoring step-by-step resolution guides to accelerate team readiness and reduce recurring support incidents.

Automated Data Ingestion Bot — RPA Low-Code Pipeline | Pingahla

May 2026 – Present

- Engineered an unattended Automation Anywhere A360 RPA bot to automate extraction, filtering, and routing of encrypted unstructured data payloads — eliminating manual intervention and directly feeding validated data into enterprise analytics workflows.
- Built multi-layered metadata validation controls and automated staging-directory purge logic to enforce data consistency and pipeline isolation — reducing data contamination incidents to zero.
- Implemented dynamic file-path resolution mechanisms to maintain uninterrupted bot execution across varied production environments, demonstrating low-code automation proficiency directly applicable to Power Automate and Microsoft RPA workflows.

Freelance Web Infrastructure & Technical Support | Self-Employed

2023 – 2025

- Managed end-to-end web hosting setups using Hostinger and PowerHost — handling server provisioning, FTP file management, and production environment configuration for client websites.
- Configured DNS records (A, CNAME, MX), installed SSL certificates, and diagnosed DNS propagation and connectivity issues — directly applying TCP/IP and DNS troubleshooting skills.
- Deployed and maintained SQL databases for web applications, configuring connection strings, user permissions, and resolving database connectivity errors in production environments.

Home Lab — Virtualization & Network Troubleshooting | Self-Learning

2023 – 2024

- Configured isolated VMware and VirtualBox environments to simulate enterprise multi-OS deployments (Windows 10/11, Linux) — developing hands-on experience with OS-level troubleshooting, disk management, and system recovery.
- Performed advanced system recovery including disk partitioning, MBR/GPT conversion, and boot-level failure resolution using Rufus and Windows Recovery Environment (WinRE).
- Set up virtual network adapters (NAT/Bridged) to test connectivity, DNS resolution, and inter-machine communication — building practical networking troubleshooting fundamentals.

CERTIFICATIONS & MICROSOFT LEARN BADGES

- [Microsoft Learn: Azure Architecture & Services \(Badge\)](#)
- [Microsoft Learn: Azure Identity, Access & Security \(Badge\)](#)
- [Microsoft Learn: Get Started with Microsoft Data Analytics \(Badge\)](#)
- [Microsoft Learn: Get Started Building with Power BI \(Badge\)](#)
- [AWS Certified Cloud Practitioner](#)
- AWS re/Start Graduate – 3-month full-time: Cloud Computing, Networking, Hands-on AWS Labs
- [Google Data Analytics Professional Certificate](#)
- [Applied Data Science with Python – Level 2 \(IBM\)](#)
- [Data Analysis with Python – IBM SkillsBuild \(DA0101EN\)](#)
- [Python with Advanced AI – Skill India Digital, IIT Madras](#)
- [Core Java Internship – 1 Month Full-Time \(Verified\)](#)
- Soft Skills: Communication, Group Discussion & Presentation – TCSion

EDUCATION

B.Tech in Computer Engineering | KCE Society's College of Engineering and Management, Jalgaon

Aug 2021 – Jul 2024 | CGPA: 7.43 / 10

Post Matric Diploma in Computer Engineering | Government Polytechnic, Jalgaon

Jul 2018 – Jul 2021 | 84.23%
